Objective

As a Full-Stack Developer with expertise in C# backend development and experience in front-end technologies, I am dedicated to designing, coding, testing, and supporting scalable applications. I am seeking opportunities to contribute to innovative projects while continuing to grow my back-end architecture and full-stack development skills.

Skills

Languages: C# / Java / JavaScript / SQL / HTML / CSS

Frameworks & Libraries: ASP.NET Core / React / jQuery / MVC / Entity Framework / Bootstrap

Databases: SQL Server / MySQL / SQLite

Tools & Platforms: Git / Visual Studio / Azure DevOps / GitHub / Docker / Android Studio

Mobile Development: .NET MAUI / Xamarin

Methodologies: Agile / Domain-Driven Design (DDD) / Test-Driven Development (TDD) / Waterfall

Experience

Software Developer @ Brock Solutions

Kitchener, ON

May 2023 – Present

Technologies Used: C#, ASP.NET Core, React, SQL, DDD, TDD

- Focused on backend development using C# for the SmartSuite Baggage Information Display System (BIDS).
- Implemented solutions based on functional specifications, handling design, coding, testing, deployment, and support.
- Mentored junior developers through code reviews, pairing, and collaborative troubleshooting.
- Contributed to production deployments, ensuring stable and efficient system performance.
- Applied DDD and TDD patterns to align software with business needs.

Programmer Analyst (Co-op) @ Waterloo Regional Police Service

Kitchener, ON

January 2022 – August 2022

Technologies Used: C#, ASP.NET Core, SQL, JavaScript, Web Development

- Designed and developed customized web applications based on management input.
- Maintained and improved existing web applications.
- Conducted unit and system testing; engaged with users to ensure usability.

- Proactively responded to technical support, training, and customer service needs per established guidelines.
- Developed scripts to extract and analyze data, providing valuable insights to senior management.

Software Developer Intern (Co-op) @ Descartes Systems Group

Waterloo, ON

September 2021 – December 2021

Technologies Used: C#, ASP.NET Core, JavaScript, SQL, MVC

- Developed new projects and maintained existing ones, adhering to development policies.
- Gained hands-on technical skills in the following: C#, ASP.NET Core, JavaScript, MS SQL Server, Web Services, HTML5, MVC, Bootstrap.
- Designed solutions for high-volume, multi-tenant SOA/SaaS environments.
- Diagnosed issues with applications and suggested appropriate remedies.

PC Support Technician (Co-op) @ Waterloo Regional Police Service

Waterloo, ON

May 2021 – August 2021

Technologies Used: IT Support, Hardware & Software Management, Network Monitoring

- Identified and initiated resolutions to client problems and concerns associated with IT equipment, hardware, and software.
- Monitored event tracking consoles to identify emerging network issues to be resolved.
- Installed, upgraded, and tested computer equipment according to department standards and procedures.

Education

Computer Programmer/Analyst (Co-op) Program @ Conestoga College

Kitchener, ON

January 2020 – April 2023

- Graduated with high distinction and a 3.90 GPA.
- Won 2nd place in a capstone competition with SmartMark, an AI project that generated text and images for marketing based on prompts.
- Mastered object-oriented analysis, design, and agile methodologies.
